# About Krabi Nature elephant trekking and river camp.

Our elephant camp is just a 7 km. car ride from Ao Nang where the natural surroundings provide permanent shade and abundant water for the animals all the year round. Your elephant trek will take you along a river running through the camp and into the forest at the foot of the mountain. You will see river-rainforest and hopefully, monkeys and birds living in their natural habitat. Captive animals cost approximately US\$ 500 per month for the food and care.

When considering an elephant trek, be sure to check that your tour operator takes good care of his animals, as a number of unscrupulous operators seriously abuse the elephants and or fail to provide adequate shade and water for their well being. Our elephants are accustomed to human presence and pose no danger to either adults or young children.
